W.U. BIOENGINEERING CENTER  
Accession No. 94-111

GUIDE

The Center for Bioengineering is a unique academic enterprise which has evolved to provide education and conduct research at the interface of engineering with biology and medicine. This involves, in its broadest sense, the application of engineering principles and techniques to biomedical problems. Among the largest of such programs, the Center is unusual in that it is jointly sponsored by, and deeply involved in both the School of Medicine and the College of Engineering. Lee L. Huntsman has been director of the Center since 1970.

The records in this accession span the years 1957 to 1992, but mostly date 1967 to 1989. They were transferred to the Libraries in 1994 and processed in 1997. They measure 1.21 cubic feet.
